It covers shop mathematics, blueprint reading, metallurgy, layout methods for precision fabrication, laser, waterjet, and plasma cutting, and safety topics.

Metal Fabrication: A Practical Guide - Fourth Ed.

Metal Fabrication: A Practical Guide-4th Edition. Author: Robert O'Con and Richard Carr. The future of US manufacturing is both challenging and promising. The promise is in the fact that many firms have successfully embraced the principles of what is called the "new manufacturing model" driven by computer technology, this model is defined by the use of CAD/CAM methodology, statistical analysis of process, and the concepts of lean manufacturing.
