An optical fiber connector joins optical fibers, and enables quicker connection and disconnection than splicing. The connectors mechanically couple and align the cores of fibers so light can pass. Better connectors lose very little light due to reflection or misalignment of the fibers. In all, about 100 different types of fiber optic connectors ...

Anyway, for my experiment in connection with this article, I am leaning towards another driver solution because I found a robust (and easy to use) 'universal' HDD BLDC motor driver board coming from China. The driver board can be used to drive both 3-wire and 4-wire three phase brushless dc motors.
